OUR STORY

People at Bees N Hives have decades of experience in manufacturing leather & textile goods. The company started as a venture of two young entrepreneurs – driven by sheer enthusiasm & commitment toward their work.

With the mission of *protecting the bees & the beekeepers*, Bees N Hives started operating in 2017. Under the visionary leadership of millennials & experience of industry veterans, our beekeeping clothing line established a solid repute in the industry, in a very short span of time. From the very beginning, we have been innovating new developments in our protective clothing & gloves range for the beekeepers.

Our zero compromise policy on the quality of raw materials & the high standards of our manufacturing process promises us great feedback & satisfaction of our customers. Along with the unbeatable quality of our products, highly competitive wholesale prices, OEM customizations & after sales services are what set us apart from other suppliers.

Over these years, we have developed a well-equipped, well-organized & state-of-the-art manufacturing facility which is capable of producing a diverse range of textile & leather products. At present, we work on make-to-order model, supplying truly extensive range of products not only for beekeeping but also extending to protective gear, sportswear, fitness wear, leather garments & accessories.

Our affiliations with the major industrial associations & certifying authorities is yet another reason for the implementation of the highest standards & professional practices at our factory. Our foremost priority regarding our customers is to provide the best before & after sales service.

We offer flexible payment plans & secure payment methods.
